.NET DEVELOPER.

Independent freelance .NET developer since 2010, with 15+ years across the whole stack: web, desktop, mobile, back-end services, databases, Azure, DevOps and AI integration. I take software from first prototype to production, migrate legacy systems to modern .NET and automate how teams build and ship.

Primary stack	C#, .NET 10, ASP.NET Core
Platforms	Web, desktop, mobile, server
Cloud	Microsoft Azure
AI	MCP, LLM integration, agents
Engagement	Freelance since 2010, remote
Languages	English, German, Czech
Contact	jan.vratislav@gmail.com

15+
years shipping .NET

12
years with one Swiss client

5
countries of client teams (CH, US, UK, IN, CZ)

AZ 400
Microsoft DevOps Engineer Expert

§ 01 CAPABILITIES

01.1 · NEW FOCUS

AI development & integration

Bringing large language models into real products: MCP servers that connect AI assistants to internal systems and data, LLM-powered features in .NET applications (Azure OpenAI, Anthropic Claude, OpenAI APIs), document and knowledge search, and AI agents that automate business workflows. Daily AI-assisted engineering with agentic coding tools.

01.2
Web & APIs
ASP.NET Core, Blazor, MVC, Razor and Web API back ends, Angular front ends. Hosted on IIS, Docker or Azure.

01.3
Desktop & Mobile
WPF, WinUI and the Uno Platform for Windows, web and mobile from one codebase.

01.4
Services & data
Windows services, WCF, REST, messaging, MS SQL Server design, hardware and device integration.

01.5
Cloud & DevOps
Azure, CI/CD in Azure DevOps and Jenkins, infrastructure as code with Terraform CDK and Pulumi.

01.6
Migrations
Legacy applications moved to modern .NET and new UI stacks, large codebases refactored safely.

01.7
Automation
PowerShell, build optimisation and test automation that give teams hours back every day.

§ 02 EXPERIENCE

All engagements as an independent freelancer

Current
Prague / Bern, CH

Symlab AG

FREELANCE Senior .NET Developer · remote

Lead developer of RF Studio, a web application for monitoring and configuring fleets of networked devices for a Swiss hardware manufacturer.

- **Project crisis management:** took over a troubled project, stabilised it and brought it back on track
- **Migration of a legacy C++/Qt desktop application** to a modern Blazor Server web application on .NET 10, deployed on an embedded Linux device
- **RF Studio in numbers:** 170,000+ lines of C#/Razor in 14 projects, 3,100+ automated tests, 900+ commits since mid-2026
- **Close collaboration with the hardware team** on requirements, device protocols and overall design
- Real-time dashboards, configuration management and device communication services
- **Jammer Tester:** automated production test station that drives signal generators, spectrum analysers and power supplies, runs test templates and produces PASS/FAIL reports. Developed since 2017: 50,000+ lines, 15 projects, 700+ automated tests
- Earlier engagement (2023–2024): indoor device-location software, from a WPF proof of concept to a production app with a minimal API back end

STACK / .NET 10, Blazor Server, ASP.NET Core, WPF, C++/Qt migration, instrument control

04/2024 – 03/2026
Prague / GA, US

Kahua Inc.

FREELANCE .NET Host Developer · on-site & remote

C# and XAML platform components and services for internal teams and external clients of a construction project management platform.

- Extended the ASP.NET Core Web API backend
- Cross-platform UI with WinUI and the Uno Platform

STACK / C#, ASP.NET Core, WinUI, Uno Platform

2022 – 2023
Prague / NY / London

Barclays Corporate & Investment Bank

FREELANCE .NET Developer · remote

Internal service-oriented trading application, distributed team across the USA, UK and India.

- **Reworked the build process to run four times faster**, for every developer on the codebase
- New features, code quality and testing in a large existing codebase

STACK / WPF, Windows Services, Solace Messaging

2010 – 2022
Prague / Burgdorf, CH

VertiGIS (formerly GEOCOM Informatik)

FREELANCE .NET & DevOps Engineer · remote

Twelve years designing, building and testing GIS applications on Microsoft technologies and Esri ArcGIS in a Scrum team.

- Led a small group of developers
- **Head of the internal DevOps team:** build infrastructure (Jenkins, Azure DevOps), CI/CD and infrastructure as code on Azure
- Took teams from manual releases to fully automated CI/CD

STACK / .NET, Esri ArcGIS, Azure DevOps, Jenkins, PowerShell, IaC

2013 – 2026
Prague / Switzerland

K-Technik, COMLAB, Villiger Security

FREELANCE .NET Developer & Architect · side projects

- **Legacy migration, Villiger SCM 2 (2013 to today):** ported a Windows XP application for hardware communication and data management to C# and WPF, including database design and RFID/NFC reader integration. Developed and maintained for 13 years: 66,000+ lines, 23 projects, 400+ commits
- **Test automation (2017):** WPF application verifying electronic components by orchestrating lab instruments, owned end to end from UX to release

STACK / C#, WPF, MS SQL, REST, hardware integration

2020
Prague

Sídliště solidarita

Volunteer developer

Built and deployed the non-profit's community website, sidlistesolidarita.cz.

STACK / ASP.NET Core, Piranha CMS, Docker, Linux

2011
Prague · open source

Visual Profiler

Master thesis · Dean's Award

A .NET CLR performance profiler integrated into Visual Studio. Source and demo on GitHub.

STACK / CLR Profiling API, multithreading, VS extensibility

§ 03 TOOLBOX

Languages	C# · XAML · SQL · TypeScript · JavaScript · HTML/CSS · PowerShell
Web	ASP.NET Core · Blazor · MVC / Razor · Web API · Angular
Desktop / Mobile	WPF · WinUI · Uno Platform
Services / data	MS SQL Server · IIS · Windows Server · Windows Services · WCF · REST · Solace
AI / LLM	MCP servers · Azure OpenAI · Anthropic Claude API · OpenAI API · AI agents · Claude Code
Cloud / DevOps	Azure · Azure DevOps · Jenkins · Docker · Terraform CDK · Pulumi · SonarQube · Git
Practice	Clean, testable architecture, domain-driven design, multithreaded and performance-critical code, refactoring legacy systems, NUnit and Moq, Scrum.

§ 04 EDUCATION

MSc Computer Science, 2012

Czech Technical University in Prague. Dean's Award for outstanding master thesis.

BSc Computer Science & Electronics, 2008

Czech Technical University in Prague. Graduated with distinction.

Microsoft Certified: DevOps Engineer Expert

AZ-400 · Microsoft Certified Professional

Studies and internships abroad

Three years in the USA, Singapore, Germany, Spain and Switzerland.

Languages

Czech native · English C2 · German C1
